**GENERAL NOTES**

- Number of fasteners noted in chart installed on each end of Web
- When connecting plates to chord or web members, fasteners must pass through the plate and member. If a joint connection has fasteners passing through the web, connector plate and chord, the fastener may be counted as part of the required number of fasteners for that joint.
- Minimum connector spacing (center to center or free edge) = 5/8"
- Truss connector type - #10 Drivall (Grabber)

Number of Trusses = 10 each
Chord Cut Type = Square Cut
Truss Spacing = 4'-0"
Number of Plys = 1
Weight per Truss = 787.7 lbs (per ply)
